2024 - 2024 | Erode

BACKEND DEVELOPMENT

Optimized SQL queries to improve response time by 25%. Implemented CRUD operations for the admin panel with proper form validation. Collaborated with frontend team on connecting APIs to UI using JSON. Worked on debugging and testing backend code for smooth performance.

FRONTEND DEVELOPMENT

Designed and Developed a PhpMyStorm Editor for creating custom HTML, CSS, and JavaScript, leading the complete frontend development and Backend Management.

PROJECTS

REAL-TIME CHAT APPLICATION

React.js | Tailwind CSS | Express.js | WebSockets | MongoDB

Designed and developed a real-time chat application with one-to-one and group messaging. Used WebSockets for instant message delivery without page refresh. Designed a responsive UI using Tailwind CSS for seamless experience on desktop and mobile. Built MongoDB database schema that handles users, messages, and chat rooms efficiently. Added extra features: user authentication, online/offline status.

PERSONAL FINANCE TRACKING SYSTEM

React.js | TailwindCss | Express.js | MongoDB

A responsive web application was developed for managing personal finance efficiently. The application allows the addition, editing, and deletion of income/expense records along with real-time balance updates. MongoDB was used for the secure storage of data, while React was used to dynamically update the UI. Tailwind CSS was used in designing an intuitive dashboard where spending patterns are visualized quickly.

RECIPE GENERATOR STSEM

React.js | TailwindCss | TheMealDB API | MongoDB

Designed a web application with a recipe generator, which fetches real-time recipes with ingredients, cooking steps, and instructions using TheMealDB API. Integrated MongoDB to store user favorites, search history, and lists of personalized recipes. Created a responsive, mobile-friendly UI with Tailwind CSS for seamless browsing. Enabled users to search, filter, and save recipes for quick access.
